

DEVELOPMENT OF A FLOATABLES MONITORING PROGRAM IN CHESTERFIELD COUNTY

Benchmarking

- Review existing methods developed by governmental agencies & NGOs
- Evaluate methods for feasibility

Site Selection

- Target land uses within MS4 service area (commercial, schools, municipal & residential) to develop list of potential sites
- Reconnaissance of sites for accessibility and practicality
- Choose monitoring locations from each land use

Resources

- Connect to existing resources with your area (*i.e.* anti-litter campaigns)
- Establish a working relationship

Piloting

- Select different methods identified in benchmarking to try in the field
- Launch the program based on established protocols & the trial run results
